Speech to Text

Enhancing meeting documentation with advanced transcription technology

Project Overview

This presentation introduces a speech-to-text automation system designed to enhance documentation processes and support needs within Morgan Stanley's internal communications.

Objectives

- Improve documentation efficiency
- Reduce transcription errors

Goals

- Streamline internal communication
- Enhance meeting productivity
- Foster collaboration across teams

Workflow Overview

The system captures audio from meetings.

Whisper processes speech into text efficiently.

Transcriptions are reviewed for accuracy and clarity.

Final documents are distributed to stakeholders promptly.

Performance Benchmarks Overview

Efficiency Metrics

Transcription speed improvement

Our system reduces transcription time by up to 50% compared to manual methods.

Accuracy Metrics

Error reduction rate

Achieved 95% accuracy in multi-speaker environments, significantly enhancing documentation quality.

Strategic Fit for Morgan Stanley

Efficiency in Documentation

Streamlined meeting notes

Reduce errors and improve accuracy in documentation processes.

Multilingual Support

Transcription in various languages

Enhance communication with global teams through effective language support.

Integration with Existing Tools

Seamless adoption within workflows

Maximize productivity by integrating with current systems and tools.
